

4th INTERNATIONAL WEBINAR ON **AI ML, DATA SCIENCE AND ROBOTICS** DECEMBER 16-17, 2023 | WEBINAR

Dr. Dmitrii Shapievskii

ROYGBIV PROJECTS, Berlin, Germany

7 Simple OSS Projects Using #AI, #AR/#VR, #Robots/#Drones That Will Transform Life on Earth in 2 Years and Make Human Space Travel Possible

Seven Simple OSS Projects That Will Transform Our World, Making It Safer and Better:

1. Data Privacy Legislation Compliance Software: A tool using #AI for automating adherence to data privacy laws globally.
2. Autism Support and Research Framework: Leveraging #AI to create personalized learning and support systems for individuals with autism.
3. Interplanetary Travel Planning System: An OSS project focused on developing accessible technology for space exploration planning and navigation.
4. Service and Resource Price Analysis Tool: An #AI-driven system for monitoring and justifying the pricing of various services and resources.
5. Office and Home Resource Optimization Software: Utilizing #AI to significantly reduce energy and resource consumption in homes and offices.
6. High-Performance Sports Technology Integration: Advancing sports achievements with high-tech solutions for training and performance analysis.
7. Revolutionary Software Development and SDLC Methodologies: Redefining software development practices and lifecycle management with cutting-edge OSS solutions.

These projects, achievable within 6-9 months with mid-2023 technologies.

Keywords: AI, AR/VR/XR, OSS, PII, Data Privacy, Autism.

Biography:

Dr. Dmitrii Shapievskii is an professional developer and implementing complex systems in the multiple roles of Developer, Team Lead, System Analyst, DevSecOps, Solutions Architect, Security Architect, Scrum Master, Product Owner, and Project Manager since 2001. He is Proficient in quickly mastering diverse business domains, He have successfully addressed business challenges across various fields, including finance, public utility services, electric power distribution, production and process optimization, and even preparing research programs and space experiment plans for the International Space Station (#ISS).
