

4th INTERNATIONAL WEBINAR ON **AI ML, DATA SCIENCE AND ROBOTICS** DECEMBER 16-17, 2023 | WEBINAR

Mr. Joshua Anang

Imperio, Ghana

Exploring Innovations in Dentistry and Oral Health with Artificial Intelligence

This abstract briefs on a presentation by Joshua Anang at the AI conference. This session provides an innovative solution in the world of dentistry and oral health communicating the motivation behind the research, spotlighting the gradual increase of oral diseases due to insufficient attention on oral health.

This study establishes a solution to oral health problems by adopting the prospects of machine learning and software development to provide a remote dental service of diagnostics on mobile devices. Results confirm that attention on oral health will be significantly improved with this innovative solution.

Key themes:

- Joshua Anang will discuss the latest creative solutions transforming dentistry and oral health, providing listeners with a clear view and understanding of this evolving technology.
- The presentation will beacon a game changing solution gravitated to improving the approach in oral health and dentistry between patients.
- Joshua Anang will address the best practices which will ensure successful implementation of this innovative approach.
- The session will as well address the advantages of adopting this innovative approach providing a clear perspective for listeners.

Expected outcomes:

Attendees will get a glimpse into the future of dentistry and oral health with artificial intelligence with AI, and practical methods for implementing the emerging technologies.

Biography

Mr. Joshua Anang is a distinguished Founder and CEO whose expertise lies in programming and artificial intelligence, sailing a ship of experience to this conference of innovative solutions using AI and machine learning.
