Abstract

Breast carcinosarcoma, metaplastic neoplasm of the breast, a rare type of breast tumors that accounts about 0.08 to 0.2 % of all breast cancers. carcinosarcoma is a mixed type of neoplastic cells. carcino related to epithelial cells origin. Sarcoma is a mesenchymal cell malignant tumor. This is a sever bad prognosis cancer. A few cases was reported about breast carcinosarcoma, here in we have a case of 58 female patient that has a late stage of breast mass that was diagnosed as a breast carcinosarcoma. In this case report we will show the presentation of the patient, discuss the risk factors and put our treatment plan.

Keywords: Keywords: metaplastic, cacinosarcoma, breast mass, case report.

Biography

I am a 5th year medical student at Mutah University. I have been working in research a year ago. I have published many case reports working with doctors from Al-Basheer Hospital. My exact entrest is within the surgical field. Also I am working in many studies regarding the COVID-19 pandemic. Another projects that I am leading are quality assesment and audits at Al-Karak Hospital. Finally I am leading a hospital for many international Audits and research.
