

GLOBAL WELLNESS AND INTEGRATED HEALTH CONGRESS

MARCH 15-16, 2023 | (Hotel Crowne Plaza Dubai - Deira)

Philippe Gerwill

Executive Advisor, FRANCE

Healthcare in the Metaverse

We are living in an age where more and more of our lives occur digitally. From work to shopping, from socializing to entertainment, we find ourselves increasingly relying on the virtual environment for basic needs.

But what about healthcare? How has our access and use of medical services been affected by the 'Metaverse'? The potential effects this could have on the way we give and receive medical care are immense – but just what exactly is healthcare in the metaverse? What is healthcare in this rapidly changing digital world? We will explore how different aspects of healthcare have been transformed by digitization, and why it's essential that we embrace these changes if we want to ensure effective access to quality care in today's world. We will explore how doctor-patient interaction has changed in light of recent technological advances, how these advances make it possible for clinicians to provide quality care from anywhere at any time in the Metaverse for Healthcare.

Keywords: Metaverse, Healthcare, Digital Health

Biography:

Philippe Gerwill, I worked for more than 30 years for global Swiss companies in the Specialty Chemicals, Pharmaceuticals and Biopharmaceuticals industries.

I am a TEDx and inspirational speaker, a digitalization humanist, an Innovation KOL, a futurist and a mentor/coach with a proven record of accomplishment.

I am regularly speaking at major events in Europe, Middle East and in the US but also a lot in Asia, mainly in Singapore and in China.

While being very knowledgeable and promoting digital transformation, I remain a big supporter of sustainability. I am always putting the Human at the center of the discussion and trying to keep digital transformation, nature and humanity aligned.

I am considered as an expert in digital healthcare and especially on the trending healthcare in the metaverse topics where I am giving regularly international keynote speeches and lectures.

I am actually also member of advisory boards in various startups and other tech companies.
